

KOBEX

The Better Road

Kobex

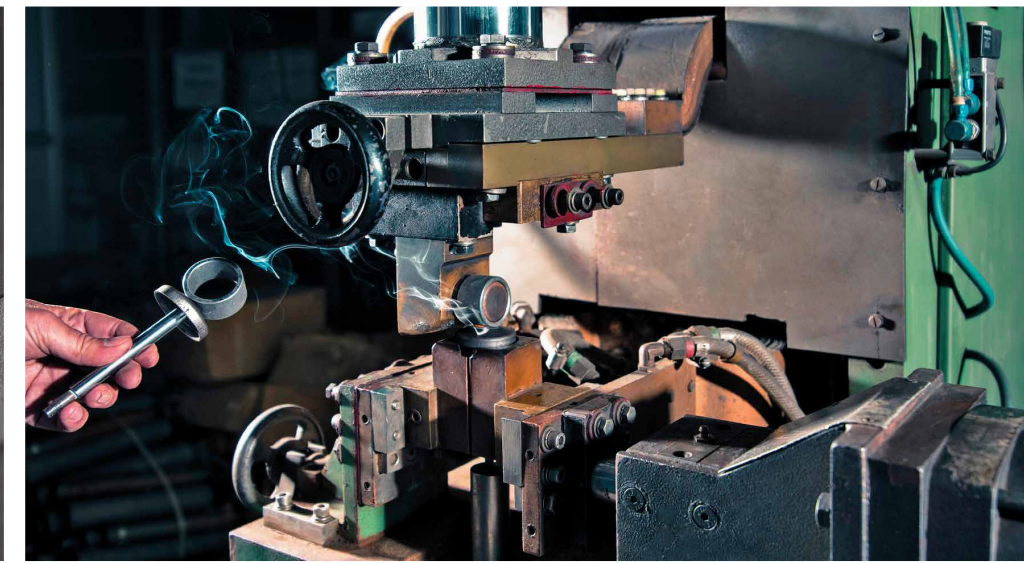

Reverse engineering meets Innovation

As a specialist manufacturer of shock absorbers, for over two decades Kobex has demonstrated a unique competence in delivering exceptional value in ride control products across the automotive spectrum. Founded in 1992 by Top Professionals from Automotive Industry, Kobex has come a long way to become a leading supplier of shock absorbers for commercial vehicles worldwide.

Leveraging superior engineering skills, development know how and sustained investments in technology Kobex has successfully developed and commercialized over 600 references of shock absorbers for international markets.

Backed by top of the line infrastructure, progressive R&D and an unwavering commitment to trust and transparency, Kobex delivers OE benchmarked product quality to customers in 21 countries across the world.

Infrastructure

Optimal Performance for Creation of Highest Value

Fully integrated modern manufacturing facility spread across an area of 30,000 Sq. Ft. Best in class infrastructure designed to comprehensively meet the requirements of target markets. Modular manufacturing setup lends flexibility in managing a vast product range.

Comprehensive measuring facilities ensure production standards are maintained throughout manufacturing value chain.

Engineering Capabilities

Four Decades of R&D Legacy

Design & Development is the core competence of Kobex. Our Engineering team carries forward over four decades of R&D Legacy of our Founders. Product Design and Validation is part of our Quality Management Programme which is certified by TUV . Backed by Extensive testing facilities, Development Know-how and latest CAD resources the product development team ensures that our shock absorbers fully meet the defined objectives for Damping performance and life expectancy.

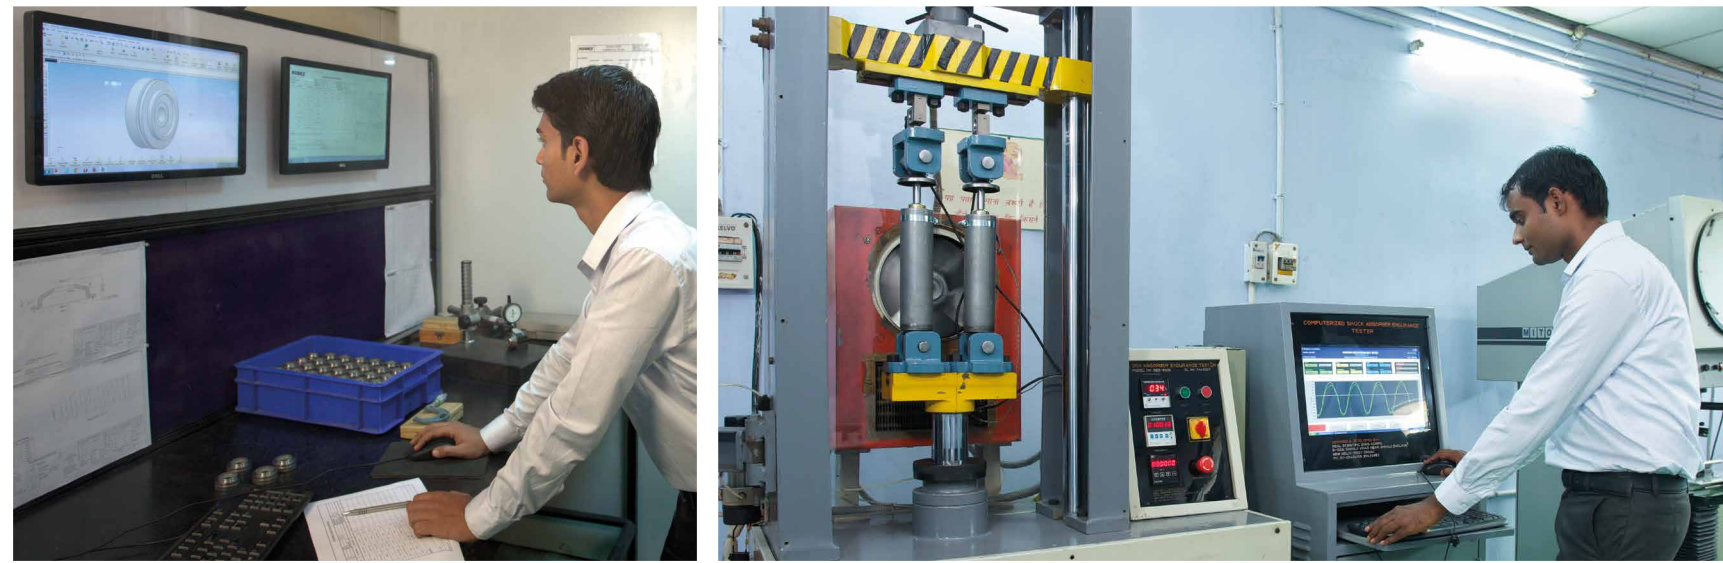

Quality

Benchmarked performance

For Kobex, quality is a significant factor in it's global success. Quality management is fully integrated into all our business processes. It begins at product development stage and extends through planning, procurement, production, packing and shipment.

Our testing facilities are conceived to comprehensively validate the shock absorbers performance benchmarked to OEM products in every aspect.

Advanced testing rigs and specially designed test procedures help in improving product design and error proofing of manufacturing processes. This ensures that shock absorber performance, reliability and life span benchmarks are fully achieved.

Products

The Wide Range Delivered Worldwide

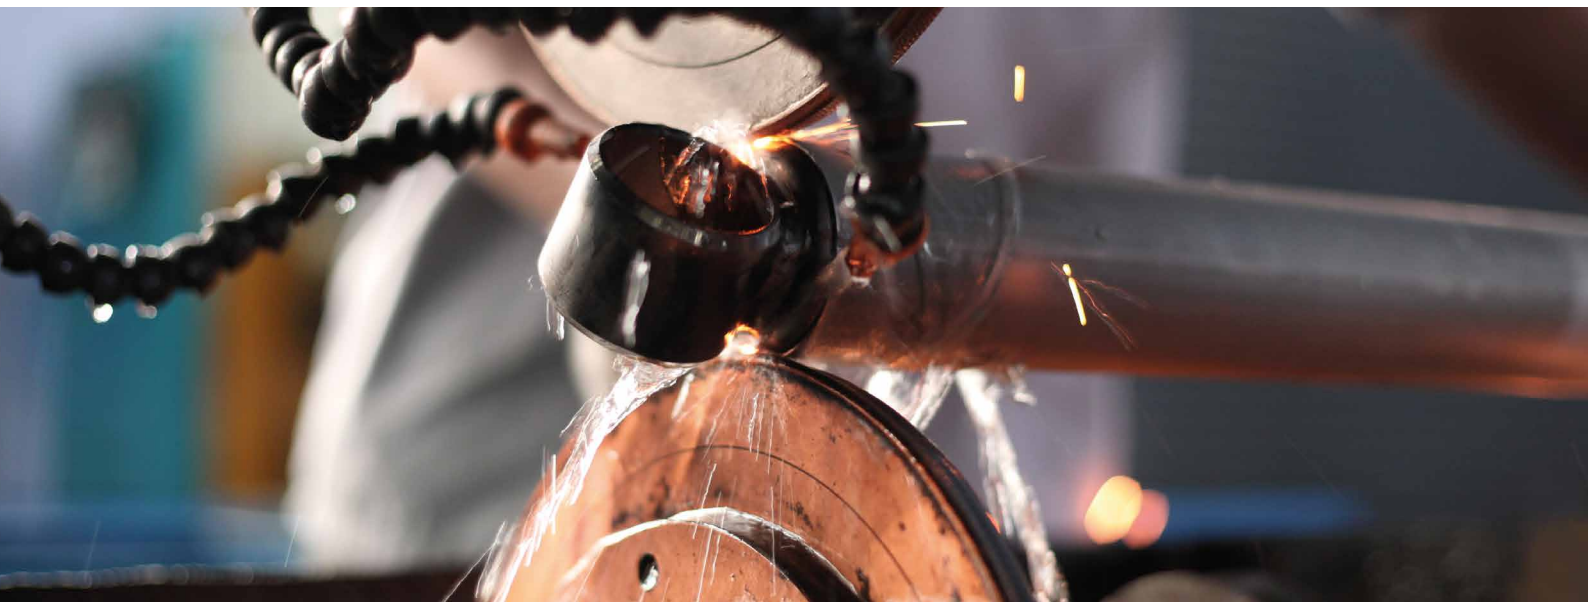

In line with our focus on international commercial vehicles we offer an exhaustive range of shock absorbers for European Trucks and Trailers that comprehensively cover Chassis, Cabin and Axle Applications.

Our extensive Design & Development resources coupled with over 1400 performance validated child parts and sub-assemblies facilitate rapid development of new shock absorbers as per customer drawings & specifications.

Complete range is presented in our Product Catalog with Images, OEM Cross References, Vehicle Fitment Information and Dimensional Data.
